

COMPANY PROFILE

FLITSOV Solution Sdn. Bhd. (1327560-H)

ABOUT US

Flitsov Solution Sdn. Bhd. was founded in May 2019. We offer our clients total solutions for their industrial automation needs to improve productivity, quality, reliability, maintenance, record keeping, and profit.

We have the expertise to provide complete engineering services, including control system design, software development, hardware fabrications, electrical site installation, total project management, testing and commissioning start up. Our 24/7 on call policy was implemented in order to minimize customer downtime with minimal cost effect for customer's better profit.

COMPANY HISTORY

2018

Established by Kevin Phoa Gek Chuan and Sim Mong Seng, to provide services for control and automation jobs.

In house team : 2 pax

2020

Expanded a business with electrical and mechanical doing.

In house team : 11 pax

2022

Expanded a business doing service & maintenance team

In house team : 19 pax

2024

Recognized by Sarawak Energy (SEB Power) with a Contractor Excellence Award.

2019

Converted from partnership to Private Limited Company (Sdn Bhd).

In house team : 5 pax

2021

Opened a branch in Kota Kinabalu, Sabah.

In house team : 16 pax

2023

Opened a branch in Kuala Lumpur

In house team : 23 pax

2025

Recognized by KVC with an Interdisciplinary Partner

To be a Company Recognized
for Operational Satisfaction

VISION

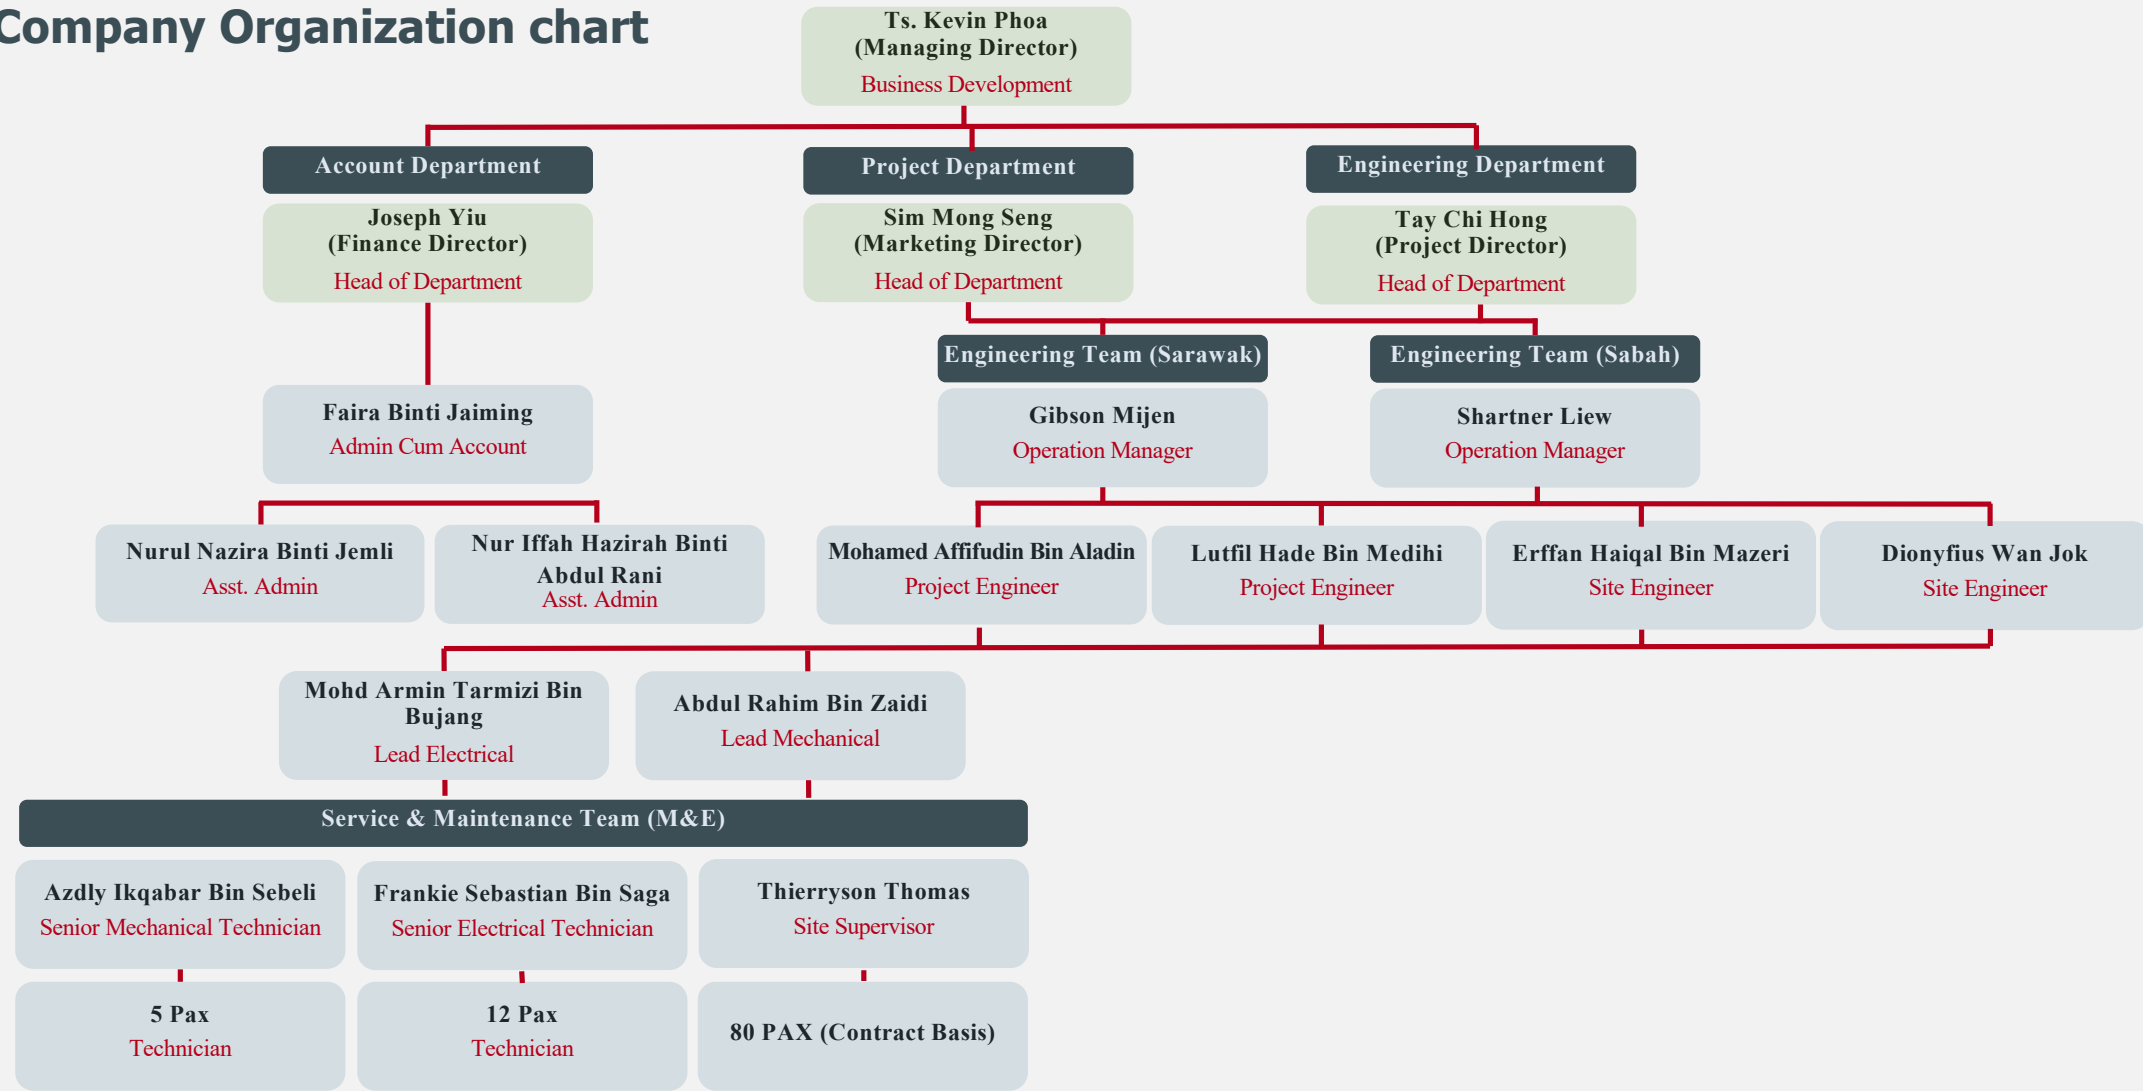

MISSION

To Ensure Customer Accepts and Receives Prompt,
Professional, Friendly and Courteous Services.

VALUES

Client Are Our Value Partner

PROJECT EXPERIENCE

Professional Certification Training Workshop

PLC & SCADA Training (JPPS, Sabah) Year 2023

PROJECT EXPERIENCE

Loji Rawatan Enapcemar Gunung Semanggol, Perak

Control & Monitoring

Hardware Used

1. Schneider M241 PLC
2. Schneider HMI

Job

1. Process Control
2. Communication between sensors, PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. Machine Expert
3. AVEVA Plant SCADA
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Skim Pembetungan Putatan Fasa 1, Sabah

Sewage Treatment Plant Control & Monitoring

Hardware Used

1. Omron CJ2M
2. Prosoft Cellular Gateway (Telemetry)

Job

1. Process Control
2. Communication between sensors, remote & client PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. CX-Programmer
3. AVEVA Plant SCADA
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Collins Aerospace, Subang
Control & Monitoring

Hardware Used

1. MicroLogix & CompactLogix

Job

1. Process Control
2. Communication between sensors, PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. Studio 5000
3. VTScada
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Kota Marudu STP, Sabah

Sewage Treatment Plant Control & Monitoring

Hardware Used

1. Omron CJ2M
2. Prosoft Cellular Gateway (Telemetry)

Job

1. Process Control
2. Communication between sensors, remote & client PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. CX-Programmer
3. AVEVA Plant SCADA
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Sandakan STP, Sabah

Sewage Treatment Plant Control & Monitoring

Hardware Used

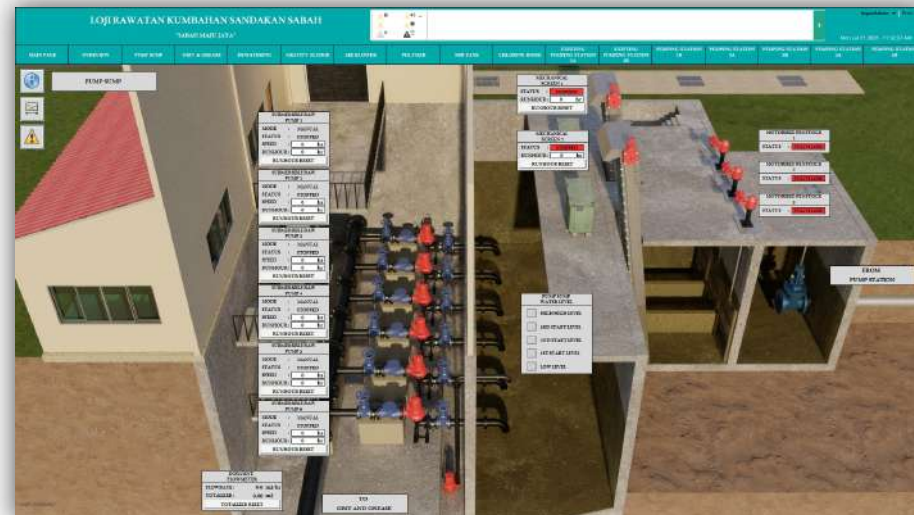

1. Omron CJ2M
2. Prosoft Cellular Gateway (Telemetry)

Job

1. Process Control
2. Communication between sensors, remote & client PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. CX-Programmer
3. AVEVA Plant SCADA
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Balai Ringin Raw Water Intake, Serian Control & Monitoring

Hardware Used

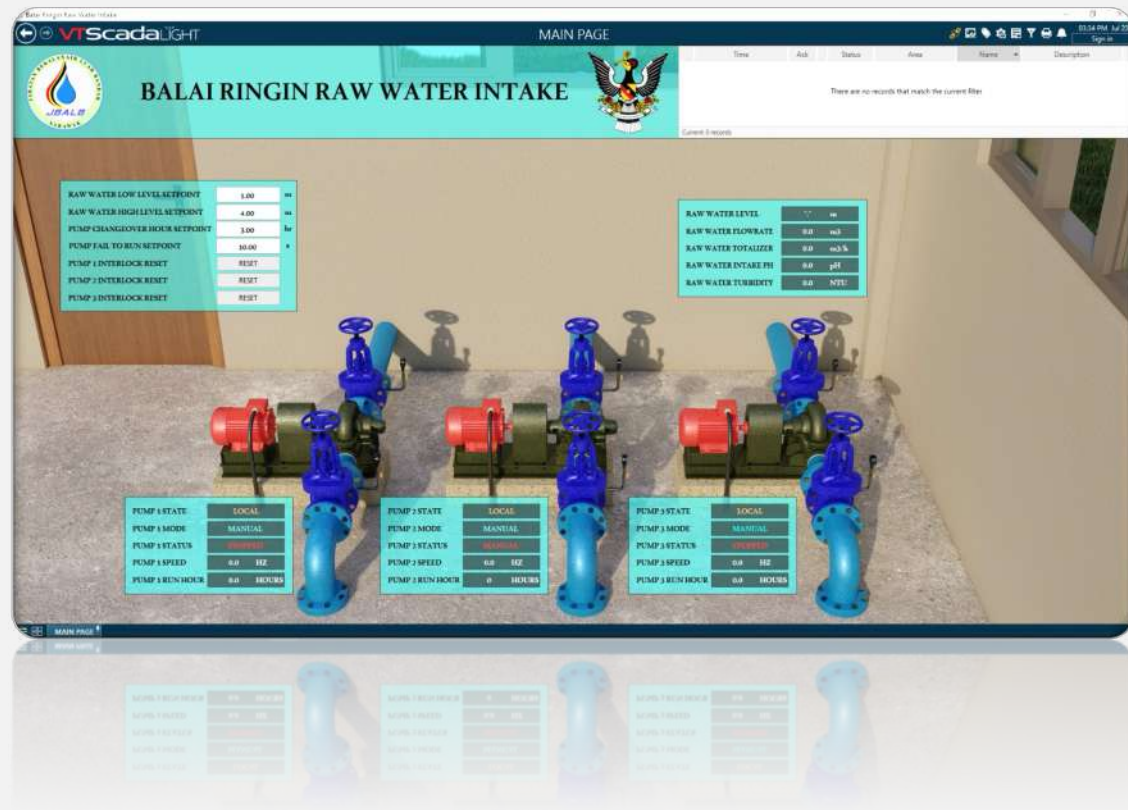

1. MicroLogix & CompactLogix
2. Prosoft Industrial Cellular Gateway (Telemetry)

Job

1. Process Control
2. Communication between sensors, PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. Studio 5000
3. VTScada
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Matadeng Booster Station, Mukah *Control & Monitoring*

Hardware Used

1. Schneider M221
2. Schneider HMI

Job

1. Pump Auto Switch Over Control
2. Communication between sensors, PLC/HMI.

Engineering Tools

1. Multi-project engineering
2. Machine Expert
3. Vijeo Citect
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Tinjar WTP, Miri

Water Treatment Plant Control & Monitoring

Hardware Used

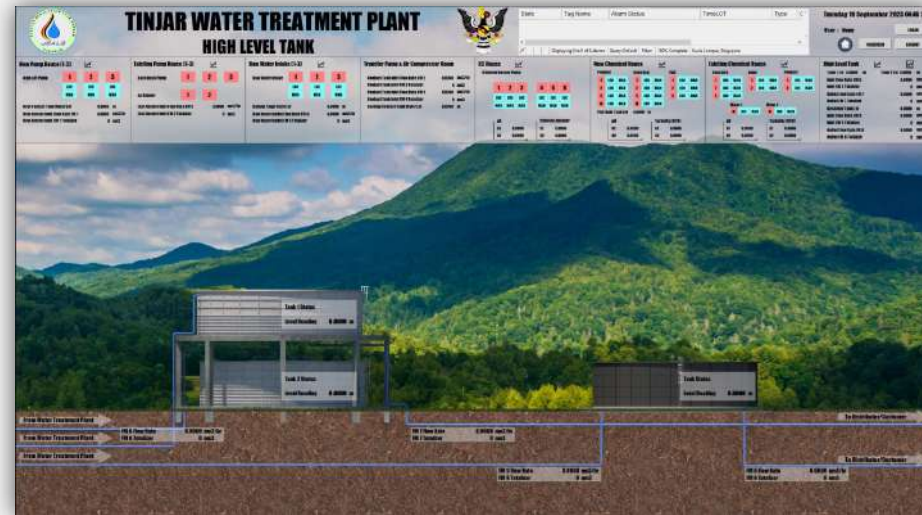

1. Siemens S7-1500
2. Siemens S7-1200
3. Prosoft Cellular Gateway (Telemetry)

Job

1. Process Control
2. Communication between sensors, remote & client PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. TIA Portal
3. Wonderware InTouch
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Water Level Monitoring

Telemetry System : High Level Tank level monitoring covering total of 84 high level tank in Sarawak.

Hardware Used

1. Gussman RTU
2. EPEVER Solar Controller

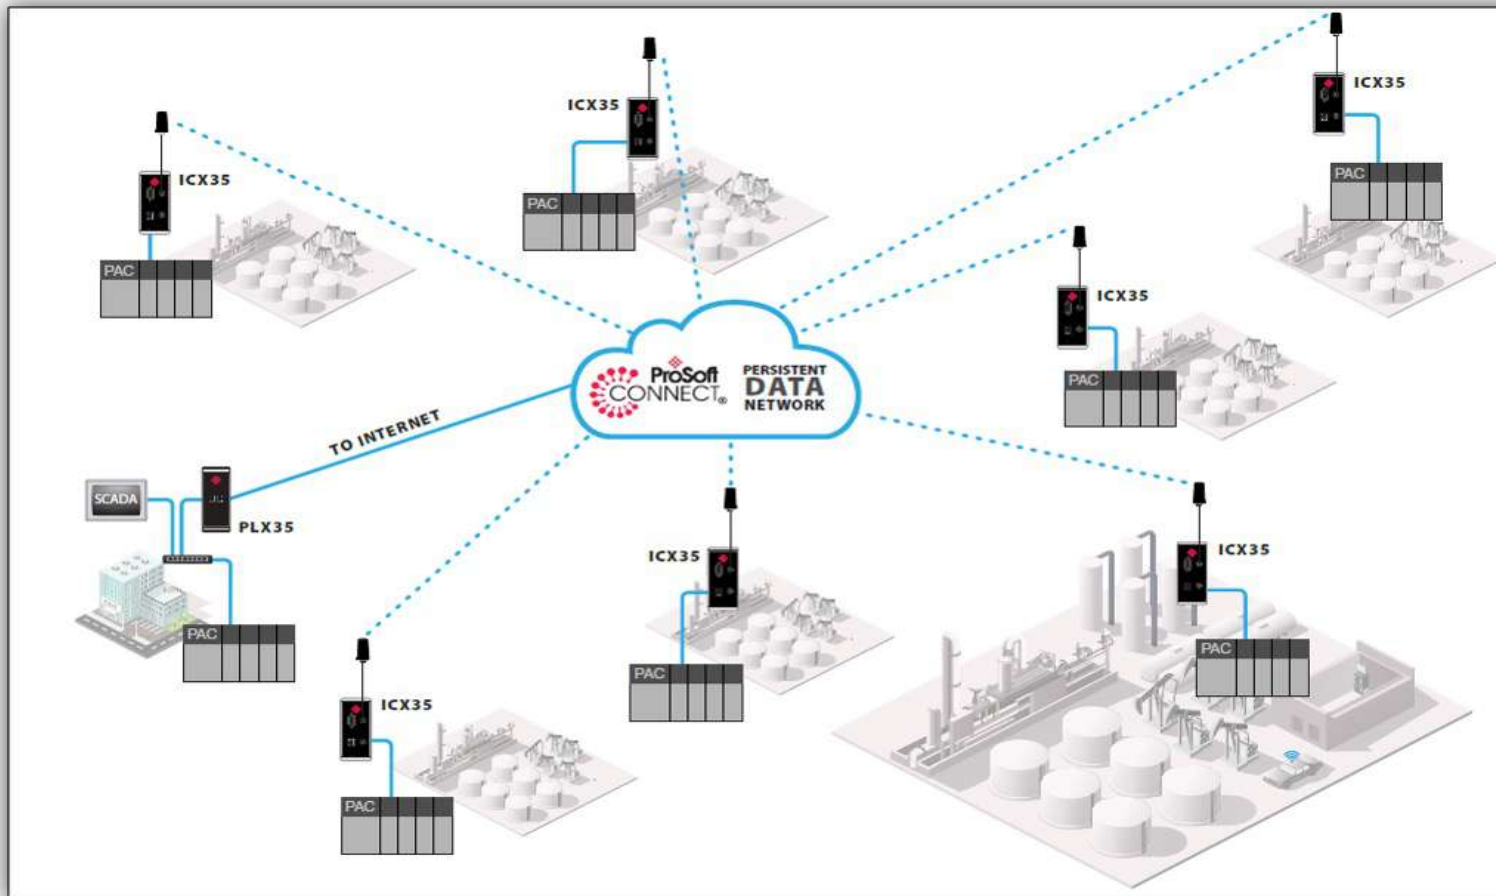

Area & sites of installation

1. Mukah - 14 Tanks
2. Kuching - 6 Tanks
3. Samarahan – 9 tanks
4. Sri Aman – 8 Tanks
5. Betong – 25 Tanks
6. Sarikei – 16 Tanks
7. Sibü – 5 Tanks
8. Kapit – 3 Tanks

TELEMETRY SYSTEM

Kundasang, Sabah

Hardware Used

1. Prosoft Cellular Gateway
2. Allen Bradley PLC

Location of installation

1. PH Water Treatment Plant
2. PH G1
3. PH G2
4. PH-PERKASA
5. PH-Reservoir C
6. PH-Reservoir 4
7. PH-Reservoir G4

Engineering Tools

1. Multi-project engineering
2. Ladder programming / Function block programming

PROJECT EXPERIENCE

Press Metal Sarawak, Mukah

Overhead crane control with monitoring system

Hardware Used

1. Allen Bradley CompactLogix
2. PowerFlex VFD with ADC Control

Job

1. ADC (Automatic Device Configuration)
2. Communication between sensors, remote & client PLC/SCADA.

Engineering Tools

1. Multi-project engineering
2. RSLogix Studio 5000
3. FactoryTalk View Studio
4. Ladder programming / Function block programming

POT TENDING MACHINE SYSTEM

Press Metal Mukah

OVERHEAD CRANE TERMINOLOGY TO CONCERN

1. Capacity
2. Height of lift
3. Crane span
4. Traveling span
5. Energy chain
6. Collision
7. Braking
8. Gravity Limit

PROJECT EXPERIENCE

Linde EOX Samajaya, Kuching

Ultra High Priority Oxygen process control

Hardware Used

1. Allen Bradley ControlLogix
2. IFix SCADA
3. Prosoft Modbus module

Common default settings

1. I/O modules set-up and properties
2. Communication between sensors, remote & client PLC/SCADA through ethernet.

Engineering Tools

1. Multi-project engineering
2. RSLogix 5000
3. Proficy Ifix
4. Ladder programming / Function block programming

PROJECT EXPERIENCE

Mukah Power Generation, Mukah
Auxiliary Boiler Control and Monitoring.

Hardware Used

1. Modicon Premium

Common default settings

1. Serial Modbus communication
2. MBNET protocol
3. PC installation & configuration
4. SCADA I/O devices protocol settings

Engineering Tools

1. Multi-project engineering
2. Wonderware InTouch
3. Modicon Premium
4. Ladder Logic Diagram

PROJECT EXPERIENCE

TALKE Malaysia, Klang

Power Monitoring System

Hardware and Software Used

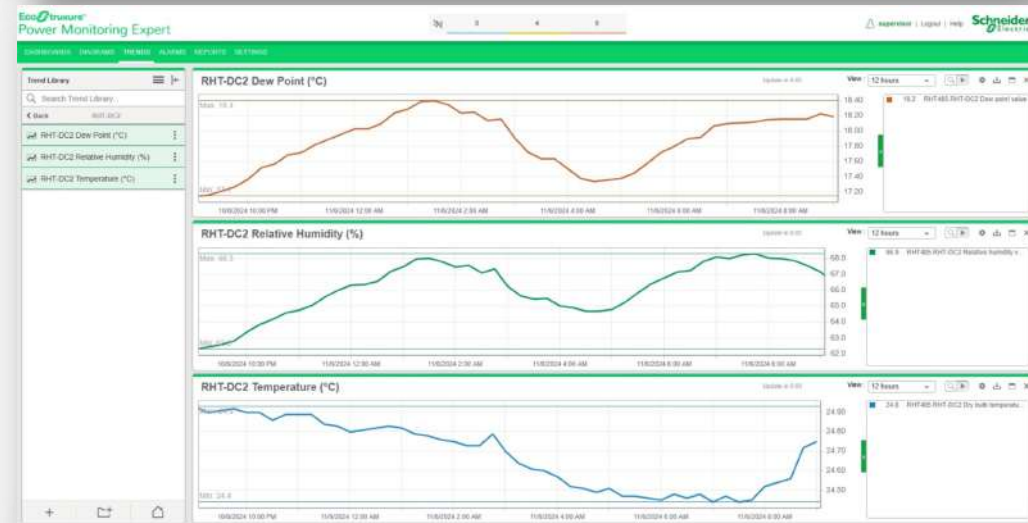

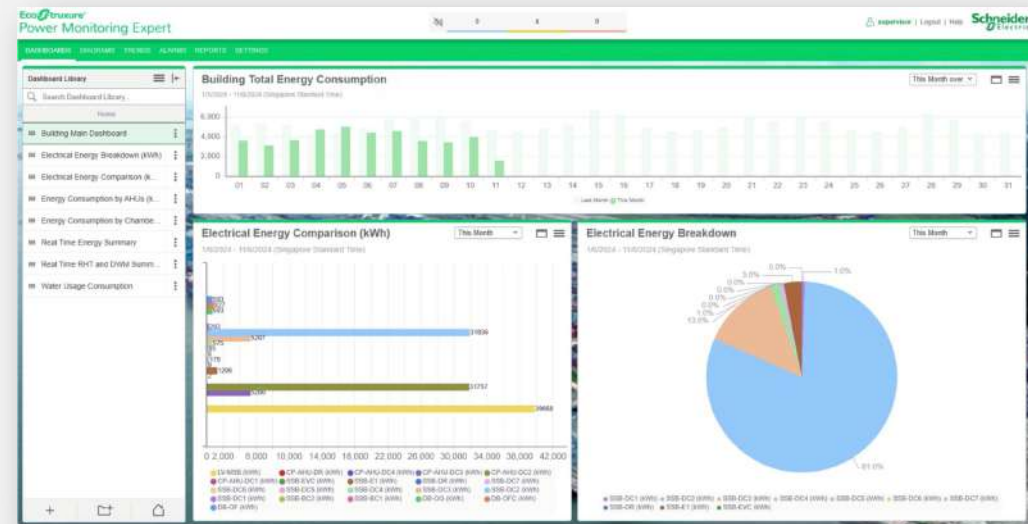

1. DPM (PM8000, PM5350, PM2230)
2. Modbus communication between power meter.

Common default settings

1. Serial to Ethernet virtual port converting switch
2. I/O modules set-up and properties
3. PC installation & configuration
4. Modbus TCP & RTU protocol

Engineering Tools

1. Multi-project engineering
2. C program
3. Power Monitoring Expert

PROJECT EXPERIENCE

Press Metal, Bintulu

Billet Stacking. Transfer Crane

Hardware Used

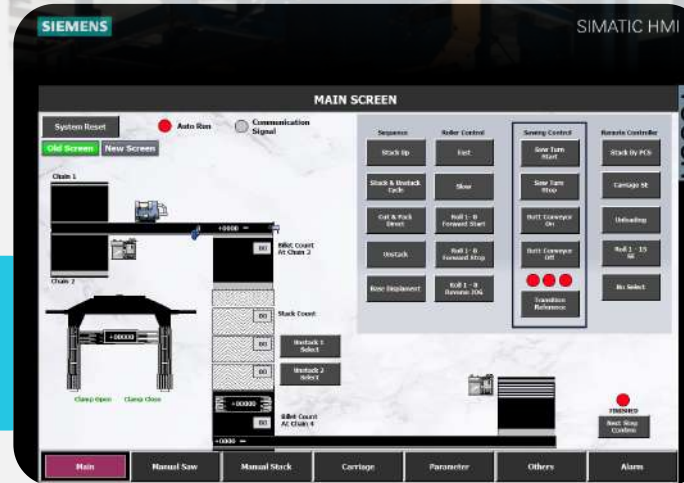

1. Siemens S7300 PLC
2. Siemens S71200 PLC
3. Siemens TI Portal V13
4. Wincc Touch Panel
5. Siemens Profibus communication

Common default settings

1. Siemens PLC settings
2. I/O modules set-up and properties

Engineering Tools

1. Multi-project engineering
2. Ladder programming / Function block programming

PROJECT EXPERIENCE

Balingian Energy Mineral, Mukah

Stacker & Reclaimer Control & Monitoring system

Hardware Used

1. Siemens S7400-H PLC
2. ABB VFD
3. Encoder

Common default settings

1. Siemens PLC settings
2. Profibus communication
3. I/O modules set-up and properties

Engineering Tools

1. Multi-project engineering
2. Siemens TIA Portal V13
3. Ladder programming / Function block programming

PROJECT EXPERIENCE

Press Metal, Bintulu

Casting line Hot water cooling system

Hardware Used

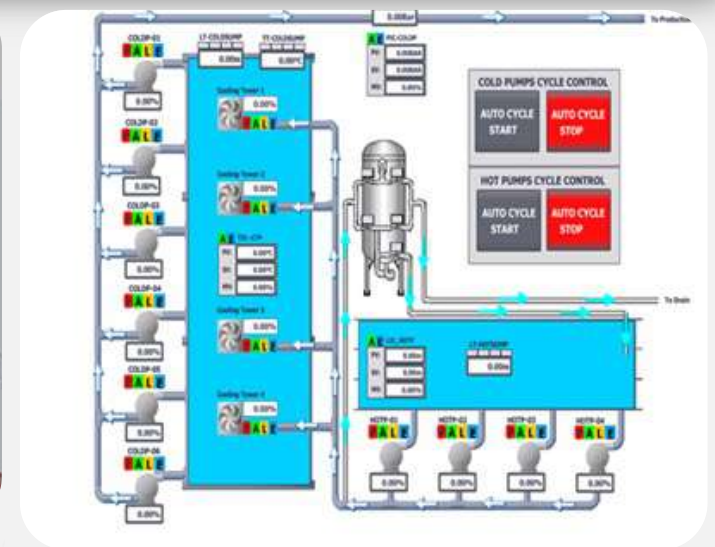

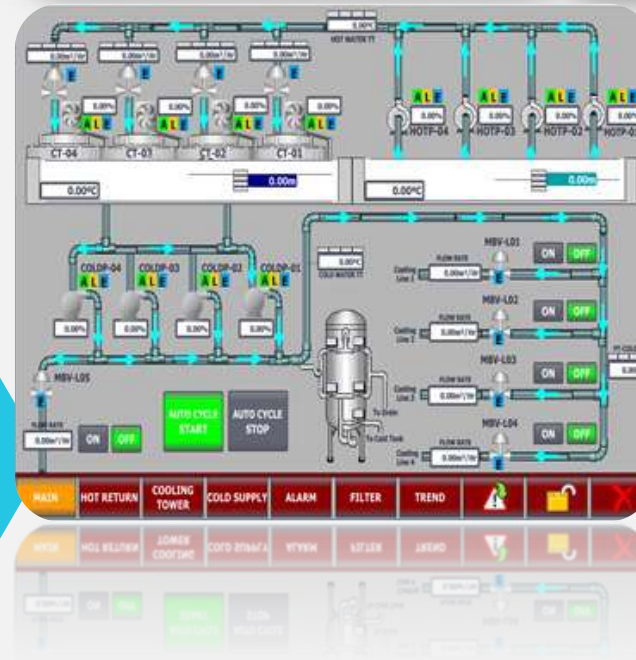

1. Siemens S71300 PLC
2. Siemens TI Portal V13
3. Wincc Touch Panel

Common default settings

1. Siemens PLC settings
2. I/O modules set-up and properties

Engineering Tools

1. Multi-project engineering
2. Ladder programming / Function block programming

PROJECT EXPERIENCE

Tingkas WTP & Petian Booster Pumps Station

Scraper & Redundancy Booster Pumps control

Hardware Used

1. OMRON – CJ2M

Common default settings

1. OMRON PLC settings
2. I/O modules set-up and properties

Engineering Tools

1. Multi-project engineering
2. Ladder programming / Function block programming

PROJECT EXPERIENCE

Stacker Monitoring, Balingian Power Generation

Stacker & Reclaimer control system

Hardware Used

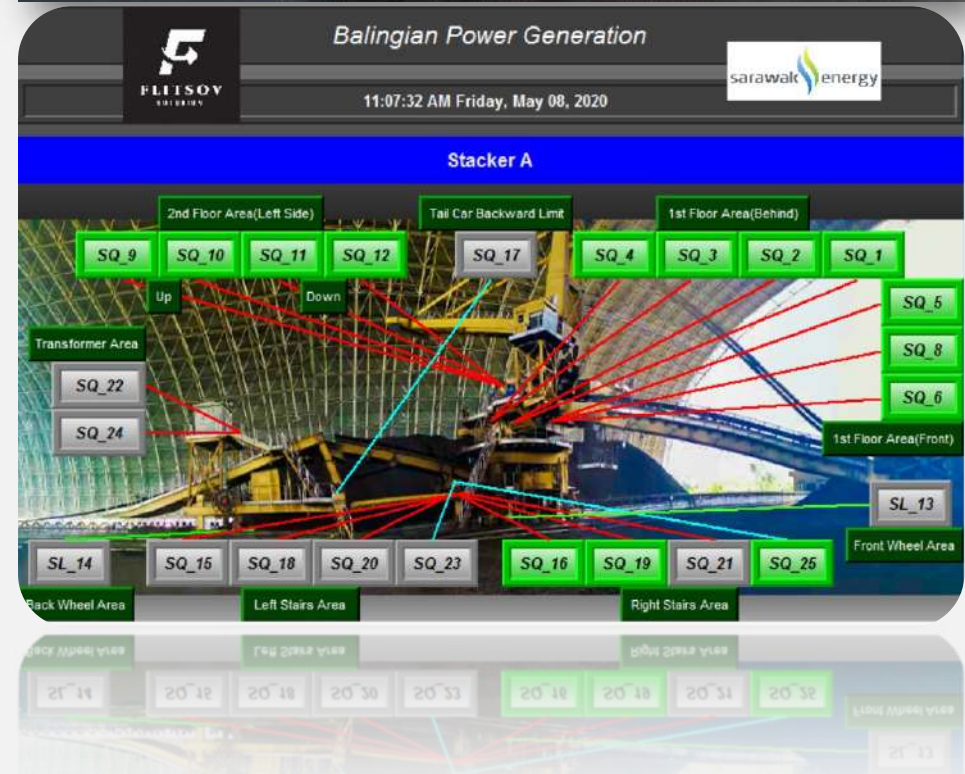

1. Allen Bradley – CompactLogix PLC
2. FactoryTalk ME HMI

Common default settings

1. AB PLC Setting
2. I/O modules set-up and properties

Engineering Tools

1. RSLogix PLC Software
2. FactoryTalk View Plus
